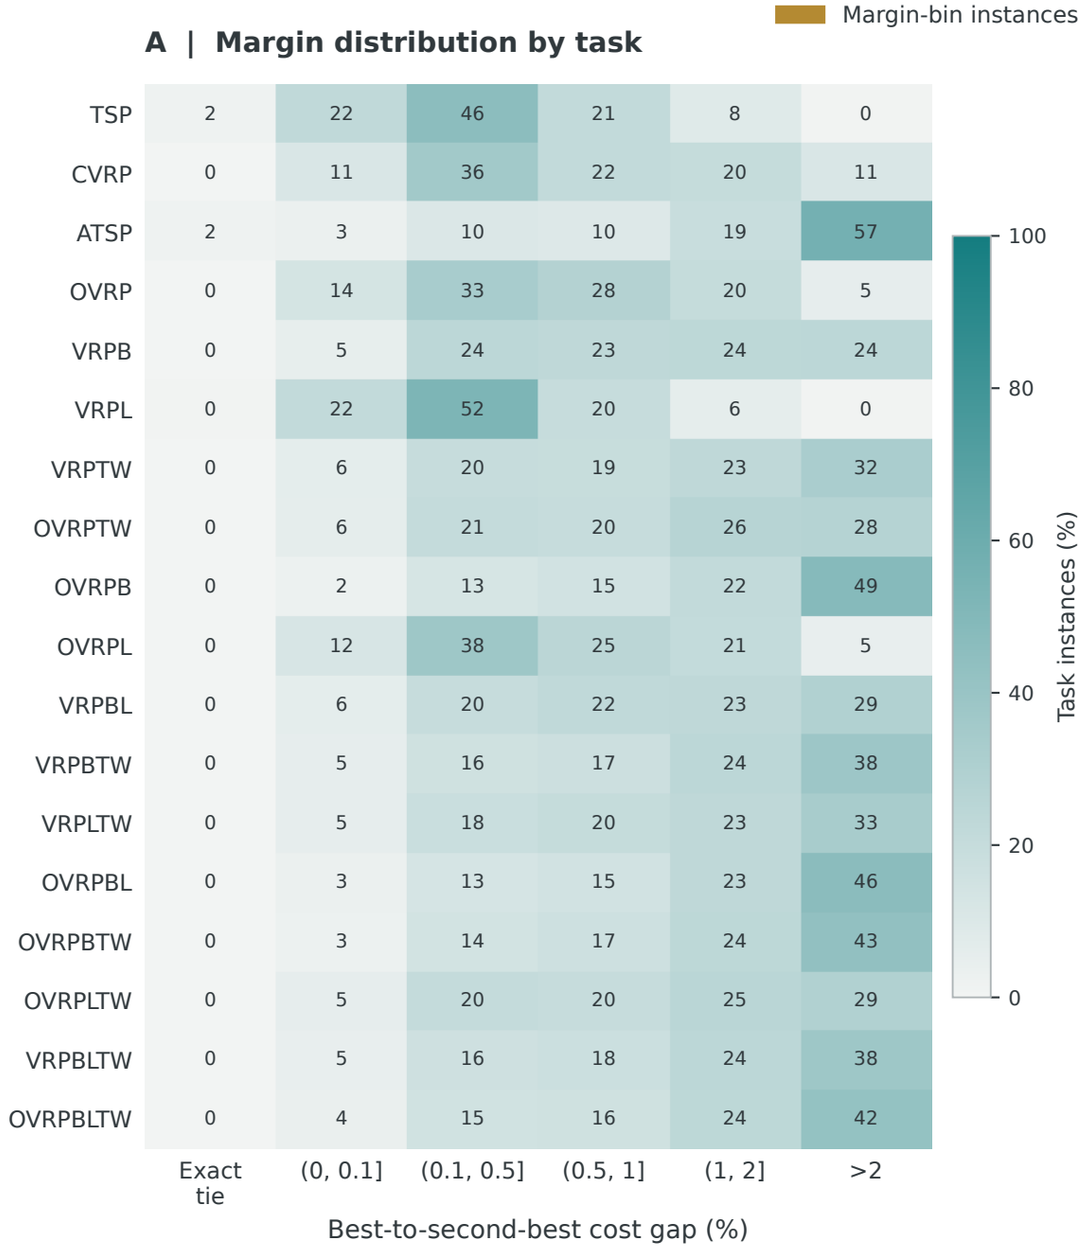
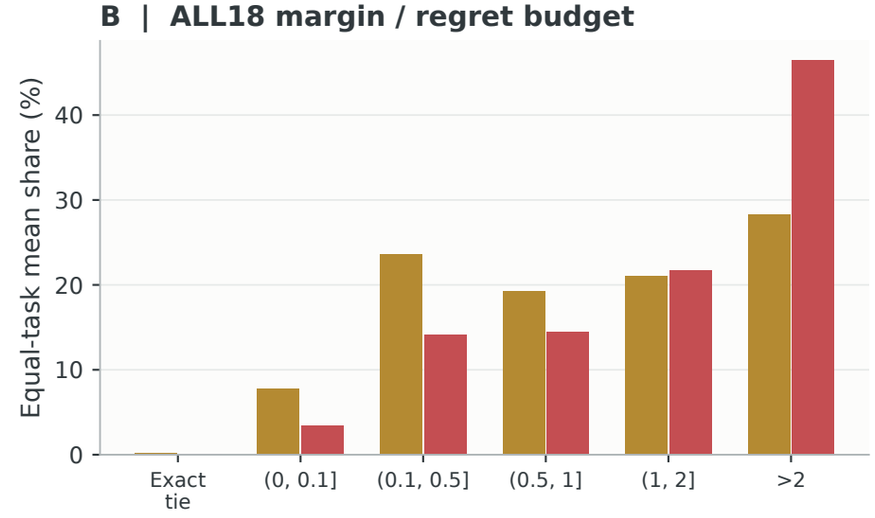
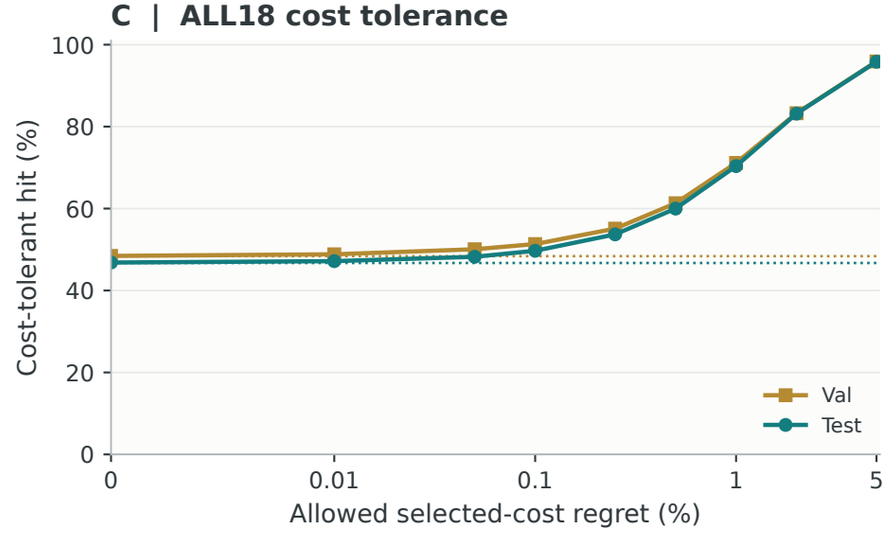
Winner-runner margins and cost tolerance answer different questions

R70B | Left and upper right: test. Lower right: validation / test. Native Top1 is not a cost-tolerant hit.







Margin is 100 x (second-best / best - 1); selected-cost regret may exceed this margin. Panel B averages per-task shares, not raw cross-task cost. Dotted lines in C: native Top1; zero tolerance permits exact-cost ties.
